# KITCHEN GUERRILLA

The Kitchen Guerrilla brand all started in 2015 from a love for food and constant experimentation. The first hot sauce began right at home and was used in meals for friends and family. This first batch of hot sauce was received with an overwhelmingly positive reaction. The buzz began to grow and with a little encouragement from family and friends, they launched their first marinade (Spicy Jerk), which has grown into a line of sauces. Products are inspired by a blend of cultures with a unique twist. They strive to deliver customers with innovative products that are infused with premium ingredients and rich in flavour.
